# Quincy Iheme

Engineering Leader at Comcast  
Greater Philadelphia

## Summary

Hi, my name is Quincy Iheme and I am a web developer from New Jersey. I originally graduated with a degree in Physics from Saint Peter's College before moving into a role at a medical device manufacturing company. A couple of years into that position, I found myself at a crossroads in my career where I could either continue down the path I was on or move on to something I could love and grow into at the same time.

Enter General Assembly, where I enrolled a 3-month full-time bootcamp to learn the skills I needed to become a web developer. Shortly after, I was hired at Comcast and have been there ever since. As the time went on, I was introduced to a volunteer driven organization named Railsbridge, which hosts 1.5 day workshops to learn Ruby on Rails and targets underrepresented groups in technology. I volunteered at a workshop in the Fall of 2014 and I have been volunteering and helping to organize the events ever since. I also worked as an Expert in Residence at General Assembly and now work as a Teacher's Assistant for Rutgers University's Coding Bootcamp in New Brunswick.

The one thing I love about this profession is that it pushes you to continually learn new technologies while also honing the skills you already have. I've also found that (through Railsbridge and working for GA and RCB) I have a passion for teaching code as well. In just two years, I've been exposed to and learned 5 different languages and countless more libraries and frameworks for increasing the power of my code and applications. While I continue to gain more experience and grow in development, I look to hone the skills I currently have while making contributions to my team.

---

## Experience

Comcast

11 years 10 months

**Manager 2, Software Dev & Engineering**

March 2025 - Present (1 year 2 months)

Philadelphia, Pennsylvania, United States

**Manager, Software Development & Engineering**

November 2020 - March 2025 (4 years 5 months)

Philadelphia, Pennsylvania, United States

- Oversees the planning and designing of software and web applications, including new programs, enhancements, and modifications.
- Provides guidance to Software Engineering team and other departments in identifying product and technical requirements. Serves as primary point of contact and liaison between Software Engineering and other teams.
- Directs implementation initiatives for new software products and applications. Organizes software update process for existing applications and coordinates the roll-out of software releases.
- Manages all the deliverables to ensure adherence to deadlines, specifications, and budgets. Implements performance metrics and prepares periodic reports. Monitors and tracks project progress and reports findings to leadership team.
- Ensures all engineers keep current with technological developments within the industry. Monitors and evaluates competitive applications and products.
- Develops proposals, hardware/software changes and other capital expenditure projects.
- Manages professional and non-exempt employees, conducting work performance reviews and Ensures work performance is adhering to Company standards. Mentors, trains and develops staff.
- Consistent exercise of independent judgment and discretion in matters of significance.
- Regular, consistent and punctual attendance. Must be able to work nights and weekends, variable schedule(s) as necessary.
- Other duties and responsibilities as assigned.

**Engineer 3, Software Development & Engineering**

February 2018 - November 2020 (2 years 10 months)

Greater Philadelphia Area

- Collaborates with project stakeholders to identify product and technical requirements. Conducts analysis to determine integration needs.
- Designs new software and web applications, supports applications under development, and customizes current applications. Assists with the software update process for existing applications, and roll-outs of software releases.

- Participates in training representatives and operations staff on internally developed software applications.
- Researches, writes and edits documentation and technical requirements, including software designs, evaluation plans, test results, technical manuals and formal recommendations and reports.
- Monitors and evaluates competitive applications and products. Reviews literature, patents and current practices relevant to the solution of assigned projects.
- Provides technical leadership throughout the design process and guidance with regards to practices, procedures and techniques. Serves as a guide and mentor for junior-level Software Development Engineers.
- Works with Quality Assurance team to determine if applications fit specification and technical requirements.
- Displays in-depth knowledge of engineering methodologies, concepts, skills, and their application in the area of specified engineering specialty.
- Displays in-depth knowledge of, and ability to apply, process design and redesign skills. Presents and defends architectural, design, and technical choices to internal audiences.
- Displays knowledge of, and ability to apply, project management skills.
- Consistent exercise of independent judgment and discretion in matters of significance.
- Regular, consistent and punctual attendance. Must be able to work nights and weekends, variable schedule(s) as necessary.
- Other duties and responsibilities as assigned

## Engineer 2, Software Development & Engineering

January 2017 - February 2018 (1 year 2 months)

Greater Philadelphia Area

- Analyzes and determines integration needs.
- Evaluates and plans software designs, test results and technical manuals.
- Reviews literature, patents, and current practices relevant to the solution of assigned projects.
- Programs new software, web applications and supports new applications under development and the customization of current applications.
- Edits and reviews technical requirements documentation.
- Works with Quality Assurance team to determine if applications fit specification and technical requirements.
- Displays knowledge of engineering methodologies, concepts, skills, and their application in the area of specified engineering specialty.

- Displays knowledge of, and ability to apply, process design and redesign skills.
- Displays in-depth knowledge of, and ability to apply, project management skills.
- Consistent exercise of independent judgment and discretion in matters of significance.
- Regular, consistent and punctual attendance. Must be able to work nights and weekends, variable schedule(s) as necessary.
- Other duties and responsibilities as assigned.

Software Development Engineer in Test  
 July 2014 - January 2017 (2 years 7 months)  
 Greater Philadelphia Area

- Worked with the development team to implement automated unit testing
- Detect, debug and provide solutions to defects
- Attend daily scrums and provide updates to team
- Work with production support team to resolve problem tickets
- Developed in an Agile and BDD environment

University of Pennsylvania  
 Web Development Instructor  
 July 2018 - October 2020 (2 years 4 months)  
 Greater Philadelphia Area

New York Code + Design Academy  
 Instructor, Front End 101  
 August 2017 - October 2017 (3 months)  
 Greater Philadelphia Area

Rutgers University  
 Teaching Assistant (Rutgers Coding Bootcamp)  
 January 2016 - February 2017 (1 year 2 months)  
 New Brunswick, NJ

Rutgers Coding Bootcamp is a competitive, 24-week full stack development program that trains students to become web developers. Offered on campus, RCB supports student success through graduation and job placement.

General Assembly  
 Expert in Residence  
 September 2015 - December 2015 (4 months)

- Be present and engaged in every class session.

- Hold weekly office hours.
- Provide feedback on student homework and projects.
- Mentor students, drawing from your own experience.
- Stay in touch with instructors and GA staff.
- Stay up to date with the class work.
- Facilitate a dynamic and collaborative classroom community.

## General Assemb.ly

### Student, Web Development

January 2014 - April 2014 (4 months)

- Built a web app that displays train arrival times for the PATH Train system
- Worked in a team that built a web app that takes users through a journey of word associations
- Built a web app that gives transit directions based on start and end addresses for commuters
- 12 week full-time course dedicated to learning how to design and build web applications
- Focused on building apps with Ruby through the Ruby on Rails framework on the back-end, HTML, CSS and Javascript on the front-end
- Version control through development using Git & Github
- Tested applications using different technologies suited to the language used following the TDD & BDD methods (Ruby on Rails- RSpec & Capybara, Javascript- Jasmine)
- Followed Agile methodologies while developing

## International Technidyne Corporation

### Coordinator, Quality Records

August 2010 - July 2013 (3 years)

Edison, NJ

- Conducting a thorough review of Device History Records (DHRs) for all ITC products and approve product release through the Enterprise Resource Planning system (ERP)
- Conduct an online review of all manufacturing and quality control areas for deviations in current Good Manufacturing Processes (cGMP), Good Documentation Practices (GDP) and Standard Operating Procedures (SOP)
- Remain up to date with cGMP as well as with manufacturing's material/ product process flow

## Parking Productions Inc

### Manager

June 2006 - August 2010 (4 years 3 months)

Clark, NJ

- Providing professional valet parking, curbside greeter, guest transportation, and traffic control services for special events, luxury high rise condominiums, country clubs, corporate and medical centers.
- To assist and lead in the smooth running of the operation.
- Supervise and implement operations on many occasions as needed.

---

## Education

Saint Peter's University

Bachelor of Science (B.S.), Physics · (2006 - 2010)

General Assembly

Web Development Immersive · (2014 - 2014)
